

I live in the greater Washington DC area and am currently an XM subscriber. Since XM came on the air with local traffic and weather, I have been a faithful listener morning and evening. Driving the Capitol Beltway and the 270 Corridor, although hasn't improved, at least now I am updated on what is going on. The traffic reports on the regular AM and FM stations leave something to be desired. The XM updates are frequent and right on the money, as well as updating MARC and Metro train services. Please don't take away this valuable service.
